Application/Control Number: 09/037,792

Art Unit: 1617

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 13-14, 16 are rejected under 35 U.S.C. 102(e) as being anticipated by Osborne.

Osborne teaches compositions comprising dissolved and Microparticulate pharmaceuticals (abstract). Semi-solids are disclosed (column 2 line 59).

Microcrystalline Dapsone is disclosed (column 8 lines 63-64).

Applicant's election with traverse of group I in Paper No. 26 is acknowledged. The traversal is on the ground(s) that the process put forth by the examiner does not produce the claimed product. This is not found persuasive because the assertion is mere unsubstantiated opinion.

The requirement is still deemed proper and is therefore made FINAL.

The election of species over polymers in paper # 15, filed 3/14/01 is withdrawn.

Claims 13-14, 16 are rejected.

Claim 15 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
